1. Research project theme

- Geometrically and Color Consistent GANs applications in Realistic Synthetic Traffic Sign Enhancement

2. Research project classification

- AMS Mathematical Subject Classification

- Computing methodologies for image processing (68U10)

- Image processing in information and communication theory (94A08)

- ACM Computing Reviews Categories and Subject Descriptors

- Computer Graphics / Picture/Image Generation (I.3.3)

- Image Processing and Computer Vision / Enhancement (I.4.3)
